Minimal

极简主义的空间设计
凭借干净的线条、纯粹的色彩
呈现出结构本身隽永的美感
去除那些不必要的繁琐设计和干扰
留下来的才是真正的高品质生活空间

Space design of minimalism
With clean lines and pure colors
Presenting the meaningful beauty of the structure itself
Remove unnecessary design and interference
The real high-quality living space is left behind

沉稳的色彩，整齐的布局，不同元素的碰撞擦出了独特的高级美，似冰洁的人，仿佛拒之千里，却更能包容一切，身处其中，在沉稳中感受生活的幸福。

The steady color, orderly layout and the collision of different elements rub out the unique high-level beauty. People who are like ice and clean seem to be far away from it, but they are more tolerant of everything, in which they can feel the happiness of life.

Technical Informations

厨房台面是厨房最重要的组件，所以选择必须谨慎，因为大部分的准备工作都是由它完成的。台面的目的不仅仅在于完成厨房的装饰与设计，还需要其他的特性，例如耐污性、实用性和功能性。因此，所用材料的选择至关重要。

Kitchen countertop is the most important component of the kitchen, so you must be careful in your choice, because most of the preparatory work is done by it. The purpose of the countertop is not only to finish the decoration and design of the kitchen, but also other characteristics, such as stain resistance, practicability and functionality. Therefore, the choice of materials used is crucial.

阻燃性

天然的石英结晶是典型的耐火材料，其熔点高达 1300 度以上，由天然石英制成的石英石完全阻燃，不会因接触高温而导致燃烧，也具备人造石台面或其它台面无法比拟的耐高温特性。

Flame retardancy

The natural quartz crystal is a typical refractory material, with a melting point of more than 1300 degrees. The quartz stone made of natural quartz is completely flame-retardant and will not burn due to contact with high temperature. It also has the high temperature resistance characteristics unmatched by artificial stone or other worktops.

抗划伤性

由于厨房台面是经常使用的，所以抗划伤性很重要。石英的硬度仅次于天然钻石，远大于厨房中所使用的刀铲利器。

SCRATCH RESISTANCE

Because kitchen countertop is often used, so scratch resistance is very important. The hardness of quartz is second only to natural diamond, far greater than the knife and shovel used in the kitchen.

耐污渍、耐腐蚀、易清洗

石英石橱柜台面具有如下重要特征：材质极度致密、无空隙、使其成为理想厨房台面的选择。因为这种材料是不可穿透的，也是无机非金属材料的代表。它的组成主要是二氧化硅和其它高分子化合物。性质稳定，具有抗腐蚀性。即使最难对付的污渍也能很容易的去除。不仅如此，植物油、酒、酱汁和咖啡，还有酸性物质如柠檬、醋、或洗涤剂残留也可以不费吹灰之力被清除。

STAIN RESISTANT, CORROSION RESISTANT, EASY TO CLEAN

Quartz cabinet table has the following important features: extremely dense material, no gap, making it an ideal choice for kitchen table. Because this kind of material is impenetrable, it is also the representative of inorganic nonmetal material. It is mainly composed of silica and other polymer compounds. It has stable property and corrosion resistance. Even the most difficult stains can be easily removed. Moreover, vegetable oil, wine, soy sauce and coffee, as well as acid substances such as lemon, vinegar, or detergent residues can also be easily removed.

表面卫生

科学证据表明多孔材料的细菌增值比无孔材料的要多，致密的、无孔的材料尤其推荐用于厨房表面。对于厨房表面卫生特别注意的顾客来说，健康是非常重要的，这也是我们的厨房台面为什么要通过 SGS 认证的原因所在。

SURFACE HYGIENE

The scientific evidence shows that the bacteria increment of porous material is more than that of nonporous material, and the dense and nonporous material is especially recommended for kitchen surface. For customers who pay special attention to kitchen surface sanitation, health is very important, which is why our kitchen countertop should pass SGS certification.
